

SiteVoice

Site Ticket Management System

Version 1.5 | 1 October 2026

1. Objective

SiteVoice gives clients and site teams one simple place to raise, track and resolve tickets about employees or the company's work on construction sites, so that nothing is lost and every ticket has a clear owner and a complete history.

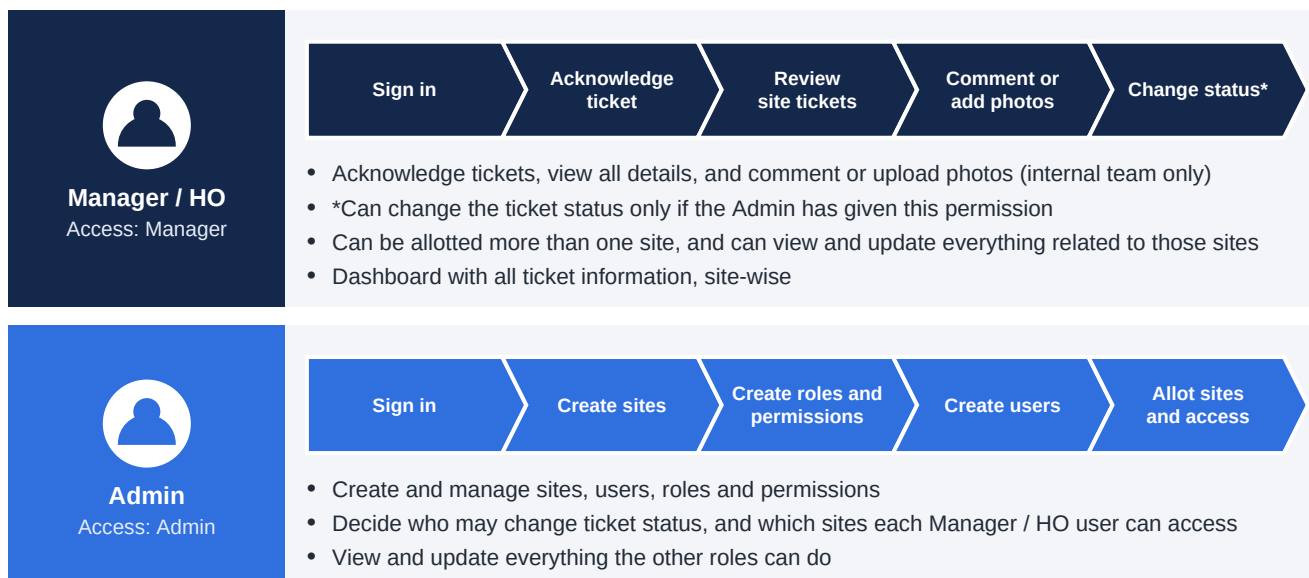

2. Stakeholders: who will use SiteVoice

EXTERNAL	PROJECT SITE	HEAD OFFICE (HO)	SYSTEM ADMINISTRATION
 Client Customers and project owners Raise tickets, follow up and confirm completion Access: Client	 Site Engineer / Supervisor Day-to-day site work Acknowledge tickets and add internal updates Access: Supervisor	 Manager / HO Project managers and senior management Oversee tickets for one or more allotted sites Access: Manager	 Admin HO Admin and IT Set up sites, users, roles and permissions Access: Admin

Everyone signs in through one login screen. What each person sees and can do depends on their role and the permissions the Admin has given them.

3. Flow and first-MVP features by stakeholder

 Client Access: Client	Sign in Raise a ticket Track progress Follow up anytime Mark Completed • Raise a ticket with a title, description, priority and type; attach photos or any other file • View the full progress of each ticket across five statuses: Pending, In Progress, On Hold, Dispute, Completed • Follow up on a ticket whenever needed • Mark the ticket Completed once satisfied with the work • Dashboard: the status of all their tickets on one page • Complete log from ticket creation to completion, visible to the client
 Site Engineer / Supervisor Access: Supervisor	Sign in Acknowledge ticket View all details Comment or add photos Change status* • Acknowledge tickets and view all their details • Comment and upload photos, visible to the internal team only and not to the client • *Can change the ticket status only if the Admin has given this permission

4. Who sees what on a ticket

Visible to the client	Internal team only
- Ticket details, status and full progress - Complete log from creation to completion - The client's own follow-ups	- Comments and photos added by Site Engineers - Comments and photos added by Managers / HO - Not shown to the client

5. MVP scope at a glance

In the first MVP
✓ Single login; roles and permissions managed by the Admin
✓ Raise tickets with title, description, priority, type and attachments
✓ Five statuses with a complete activity log
✓ Acknowledge, follow up, and client-confirmed completion
✓ Internal comments and photos, hidden from the client
✓ Client dashboard and site-wise Manager / HO dashboard
✓ Admin: sites, users, roles and permissions
